PROFESSIONAL SUMMARY

- Frontend-focused Software Engineer with 3.5 years of experience in enterprise web application development, UI engineering, feature implementation, and modern frontend technologies
- Experienced in JavaScript, HTML5, CSS3, frontend debugging and user-focused application development
- Hands-on experience in React.js development, including component-based architecture, React Router, Context API, REST API integration, reusable components, and modern frontend development practices
- Passionate about building scalable, responsive, and high-performance web applications with a focus on user experience and maintainable code

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

React Ecosystem: React Hooks, Context API, Redux, React Router, Tanstack Query

Web Development: REST APIs, Responsive Web Design, UI Development, Component-Based Architecture

Developer Tools: Git, GitHub, VS Code, Cursor, NPM, GitHub Copilot, Claude

Development Practices: Debugging, Agile Methodologies, Problem Solving

EXPERIENCE

Software Engineer

June 2022 – Nov-2025

Cognizant Technology Solutions

- * Developed and delivered new application pages and frontend features while enhancing existing modules based on evolving business requirements.
- * Customized and enhanced user interface components to improve usability, consistency, and overall user experience across enterprise application modules
- * Worked extensively with JavaScript, HTML, CSS, data binding, UI customization, and component-level enhancements within large-scale enterprise web applications.
- * Implemented debugging, error handling, testing support, and production issue resolution to improve application stability and user experience
- * Collaborated with cross-functional teams in Agile environments to deliver scalable application enhancements and business-critical solutions

PROJECTS

Gameverse App | *React.js, JavaScript, Tailwind CSS, React Router, Context API, Vite*

GitHub | Live - Gameverse | Portfolio

- * Designed and developed a React-based web application leveraging component-based architecture, modern JavaScript (ES6+), and reusable UI development principles
- * Integrated REST APIs to dynamically fetch, manage, and render application data with loading states, error handling, and responsive user interfaces
- * Implemented React Router, Context API, custom React Hooks, and client-side state management to deliver a scalable frontend architecture
- * Built responsive and interactive user experiences optimized for mobile, tablet, and desktop devices using Tailwind CSS and modern frontend development practices
- * Developed advanced frontend interactions including animations, navigation workflows, and performance-focused UI rendering techniques

EDUCATION

Bachelor of Engineering in Computer Science and Engineering

K.Ramakrishnan College of technology

2018-2022

Trichy, Tamil Nadu
